Inner-City Software Foundation

Mission

To initiate and assist activities which help communities of color move toward social parity via technology

Objectives

Create and assist programs and businesses that make people of color their primary beneficiaries, producers and owners

Strategies

Secure funds to operate internal projects
Secure donations to provide grants
Identify potential grant recipients conforming to the following criteria:
- Formally state a commitment to communities of color in their official documents
- At least 51% ownership/founding by persons of color
- Can demonstrate a track record of stability and focus on technology transfer to communities of color

Projects

- Black Facts Online
- 350 Years of History
- Inner City Access
  - **roxbury.com**
  - **dorchester.com**
  - **mattapan.com**

Tasks

- Research legality/restrictions from ethnically-focused org
- Research legality/tax advantages in ICS providing space/time/resources
- Create 1st year budget
- Create ED job description
- Determine optimal organizational/business structure for neighborhood domains

National Urban Computer Society

Mission

To provide a nationwide peer support group for persons of color who use personal computers for personal and business purposes

Objectives

Replace organizations like the Boston Computer Society with one featuring Blacks in the majority
Help ease the challenges of becoming computer-literate with a support group
Cater to specific needs/interests with SIGs

Strategies

Create SIGs that cover most popular areas
Recruit volunteer SIG managers from BBO/BPC
